EBOX ENTERPRISE

BEAUTIFUL, SIMPLE, EFFECTIVE

Perfect for medium and large companies and public buildings

For security reasons many companies or administrative buildings separate the intranet and internet networks and access to building management infrastructure. The EBOX Business has been specially designed to connect the three networks simultaneously to provide authorised people with completely secure access.

VISUALIZATION AND IOS/ANDROID APPS

Have your home the way you want it with a simple action

Your whole system can be managed via your tablet, smartphone and/or computer. There is no limit to how many devices you can connect. The display gives you simple, intuitive and ergonomic control at your fingertips of your whole environment - lighting, blinds, heating, cameras, etc.
The access management allows you to precisely define user access. This makes it easy to limit an employee's access to only cover their office, floor or department.
MONITORING

The black box of your home automation system

All of the actions and events on your home automation network are recorded. They can easily be viewed and observed. All the data is automatically saved on a USB key. This key, which comes with the EBOX, has capacity to record for 10 years for a standard private system and makes it extremely simple to export your data. In this way it can easily be viewed on another system.

COM   LAN 2   KNX   LAN 1   USB   18VDC

160

36

Device

Model name	EBOX Enterprise
Enclosure materials	POM
Dimensions	160 x 160 x 36 mm
Mounting	IT rack or distribution board (DIN rail 43880)
Protection type	IP20, EN 60529
Environment	dry rooms, 0-50°C, pollution level 2
Weight	790 g

Connection

Power supply	100-240V AC +/- 10% 50/60Hz 18VDC / 0.7A
Consumption	max. 5W
Ports	3x Ethernet 10/100, 2x USB 2.0, 1x COM
Protocol	KNX/IP
