EBOX RS

BEAUTIFUL, SIMPLE, EFFECTIVE

Guaranteed no interruptions, 365 days a year

This product is designed for systems that require a guarantee of no interruptions 365 days a year. Two systems are continuously active in order to ensure the delivery of the service. When a fault occurs on one of the systems the EBOX RS allows the necessary time to schedule repair and reconnection without any interruption.

VISUALIZATION AND IOS/ANDROID APPS

Have your home the way you want it with a simple action

Your whole system can be managed via your tablet, smartphone and/or computer. There is no limit to how many devices you can connect. The display gives you simple, intuitive and ergonomic control at your fingertips of your whole environment - lighting, blinds, heating, cameras, etc.
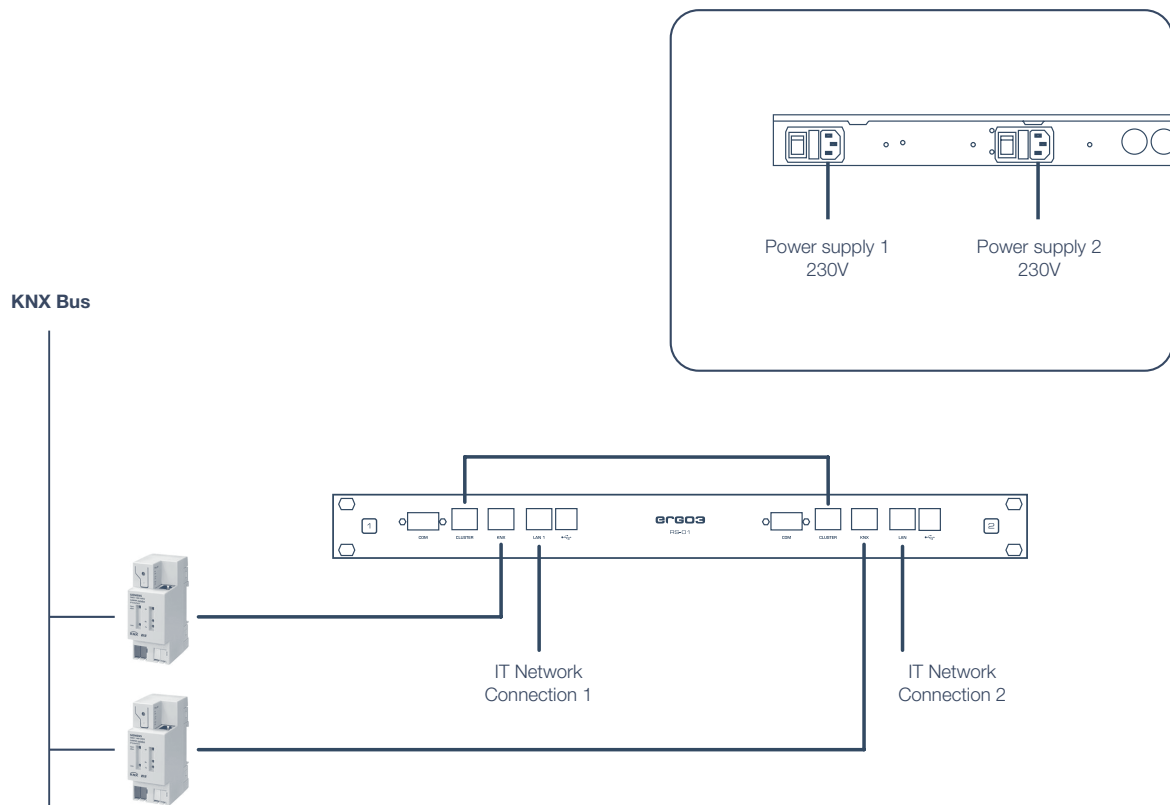

The access management allows you to precisely define user access. This makes it easy to limit an employee's access to only cover their office, floor or department.
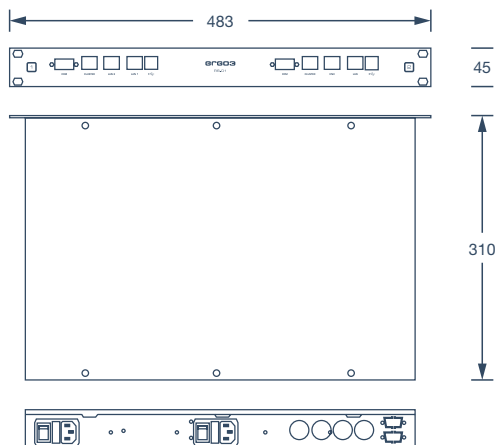

MONITORING

The black box of your home automation system

All of the actions and events on your home automation network are recorded. They can easily be viewed and observed. All the data is automatically saved on a USB key. This key, which comes with the EBOX, has capacity to record for 10 years for a standard private system and makes it extremely simple to export your data. In this way it can easily be viewed on another system.

TECHNICAL FEATURES

483

45

310

Device

Model name	EBOX RS
Enlosure materials	Galvanized steel
Dimensions	483 x 45 x 310 mm
Mounting	IT rack h = 1U
Protection type	IP20, EN 60529
Environment	dry rooms, 0-50°C, pollution level 2
Weight	3880 g

Connection

Power supply	2x 100-240V AC +/- 10% 50/60Hz
Consumption	max. 5W
Ports	6x Ethernet 10/100, 4x USB 2.0, 2x COM
Protocol	KNX/IP
